Computer Systems - □□□□□□□□

Students should be introduced to computer systems from the perspective of a programmer, rather from the more traditional perspective of a system implementer. What does this mean? Students should get a view of the complete system, comprising the hardware, operating system, compiler, and

network.

CS:APP3e, Bryant and O'Hallaron

The ICS course provides a programmer's view of how computer systems execute programs, store information, and communicate. It enables students to become more effective programmers, especially in dealing with issues of performance, portability and robustness. It also
