avoidance, congestion management, packet filtering, redirection, traffic statistics, ACL-based simplified traffic policy, and HQoS.

Configuring a Traffic Classifier - Huawei

Quality of service rules only work if the router and the quality of service algorithm can create an artificial bottleneck to redirect traffic as the QoS handler sees fit. If you use values equal to or larger than the maximum capacity of your connection then you give the QoS handler no wiggle room and the system becomes significantly less effective.

How to Use Quality of Service (QoS) to Get Faster Internet ...

After entering the class command, the device is automatically in policy map class configuration mode, which is where the QoS policies for the traffic policy are defined. The following policy map class-actions are supported: bandwidth—Bandwidth configuration options. exit—Exits from the QoS class action configuration mode.
