## **Management Of Drip Trickle Or Micro Irrigation**

Modern trickle Drip Irrigation had its infancy in 1866, when Afghanistan farmers and researchers started using clay pipes for both irrigation and drainage. Although a professor at Colorado State University in Ft. Collins, E.B. House, experimented with applying water directly to the roots of plants as early as 1913, he came to the conclusion that this system was too expensive, and the practice ...

## **Apple Academic Press**

Trickle or Drip Irrigation A well designed trickle or drip irrigation system benefits the environment by conserving water and fertilizer and requires little labor to use once it is set up. Water is applied either on the surface, next to the plant, or subsurface, near the root zone.

## **Trickle or Drip Irrigation | UMass Amherst New England ...**

Drip irrigation is a type of micro-irrigation system that has the potential to save water and nutrients by allowing water to drip slowly to the roots of plants, either from above the soil surface or buried below the surface. The goal is to place water directly into the root zone and minimize evaporation. Drip irrigation systems distribute water through a network of valves, pipes, tubing, and ...
