GUIDE TO SUTURING

Section II Oral Surgery

Suturing The ability to suture is one of the essential skills required of anyone planning to perform surgery.

Although it can appear

used to make the initial tie. The needle is next inserted through the outer surface of the buccal flap and the underlying surface of the lingual flap. The needle is then passed through the remaining loop of the suture, and the suture is pulled tightly, thus locking it. This procedure is continued until the final suture is tied off at the terminal end 146
